LIGHTECTURE

Axo Light for Architecture

É una linea composta da sei nuove collezioni, disponibili in numerose tipologie, misure, colori e fonti luminose. Nata per allestire interni di grandi dimensioni, grazie a più di 5000 varianti diventa la soluzione ottimale anche per spazi meno estesi. Gli articoli, realizzati con materiali ignifughi, hanno dimensioni che variano da 25 cm a 180 cm. La disponibilità di lampadine incandescenti, alogene, fluorescenti o ad alogenuri metallici permette di soddisfare le esigenze illuminotecniche più svariate, dal risparmio energetico alla diversificazione della qualità e dell'intensità della luce. I materiali, i colori, le dimensioni e le sorgenti luminose sono descritti alla fine di ogni collezione. Su richiesta, gli articoli sono ulteriormente personalizzabili.

LIGHTECTURE

Axo Light for Architecture

A line of lighting elements consisting of six new collections conceived in many sizes, colours, types and lighting sources. The entire line is composed of more than 5000 variations, providing perfect solutions for both larger and smaller interior spaces. The dimensions of our lamps, manufactured with flame retardant materials, range from 25 cm (9 7/8") to 180 cm (70 7/8"). We have designed our items with different lighting sources – incandescent, halogen, fluorescent and metal halide lamps – in order to satisfy the most varied technical requirements such as the saving of energy and the possibility of modifying the quality and intensity of the light itself. Fabrics, colours, sizes and lighting sources are described at the end of each collection. All items can be further customised upon request.

LIGHTECTURE

Axo Light for Architecture

Die Linie besteht aus sechs neuen Kollektionen, die in verschiedenen Ausführungen, Maßen, Farben und Lichtquellen erhältlich sind. Sie ist zwar für die Inneneinrichtung großer Räume ins Leben gerufen worden, kann aber dank der über 5000 Varianten auch zur optimalen Lösung für kleinere Räume werden. Die Maße der mit schwer entflammbarem Material bezogenen Artikel liegen zwischen 25 cm und 180 cm. Der Einsatz von Glühbirnen, Halogen-, Fluoreszenz- oder Metallhalogenidlampen bietet die Möglichkeit, den verschiedensten Anforderungen gerecht zu werden: von der Energieeinsparung bis zur Einstellung der Qualität und der Intensität des Lichts. Die zur Auswahl stehenden Materialien, Farben, Maße und Lichtquellen sind nach Beschreibung jeder Kollektion angeführt. Auf Anfrage können Spezialanfertigungen hergestellt werden.

LIGHTECTURE

Axo Light for Architecture

C'est une ligne composée de six nouvelles collections, disponibles dans de nombreuses typologies, dimensions, coloris et sources lumineuses. Conçue pour aménager des intérieurs de grandes dimensions, elle devient aussi la solution optimale pour des espaces moins grands grâce à plus de 5000 déclinaisons. Produits en matériaux ignifugés, les articles ont des dimensions qui varient de 25 cm à 180 cm. La disponibilité d'ampoules incandescentes, halogènes, fluorescentes ou à halogénures métalliques permet de satisfaire les exigences les plus variées, de l'économie d'énergie à la diversification de la qualité et de l'intensité de la lumière. Les matériaux, les coloris, les dimensions et les sources lumineuses sont décrits à la fin de chaque collection; vous pourrez compter en outre sur la plus grande disponibilité d'Axo Light pour personnaliser ultérieurement les produits.

LIGHTECTURE

Axo Light для архитектуры

Это линия, состоящая из шести новых коллекций, включающих различные типы, размеры расцветки и лампочки. Созданная для отделки помещений больших размеров, эта линия, благодаря более 5000 вариантам моделей, становится оптимальным решением и для меньших пространств. Светильники, сделанные с огнестойкими материалами, имеют размеры от 25 до 180 см. Возможность выбора среди ламп накаливания, галогенных, люминесцентных или металлогалогеновых ламп позволяет удовлетворить самые различные потребности, начиная от экономии электроэнергии и заканчивая диверсификацией качества и интенсивности света. Материалы, цвета, размеры и источники света описаны на конце каждой коллекции. По просьбе заказчика можно изделия дальше индивидуализировать.

Il borghese che nasce con Luigi Filippo ama trasformare la natura in intérieur. Nel 1839, si tenne un ballo all'ambasciata inglese. Furono ordinate duecento piante di rose. "Il giardino – racconta un testimone oculare – era stato ricoperto con un tendone e pareva un salotto. Ma che salotto! Le aiuole, ricoperte di fiori profumati, si erano trasformate in enormi giardinieri, la sabbia dei viali scompariva sotto splendide passatoie e, invece delle panchine di ghisa, c'erano canapè rivestiti di damasco e di seta; un tavolo rotondo reggeva libri e album. Da lontano, il suono dell'orchestra penetrava in questo gigantesco boudoir". (I 4, 1°)

L'elemento genetico ideale della curvatura variabile, o della piega, è l'inflessione. L'inflessione è il vero atomo, il punto elastico. Klee la enuclea come elemento genetico della linea attiva, spontanea, testimoniando così la sua affinità con il Barocco e con Leibniz, opponendosi a Kandinsky, cartesiano, per il quale gli angoli sono duri, il punto è duro...
